# The Company

## Lift Engineering Company

Simply by being alone in the Egyptian market with its extensive experience for 50 years and the experience of its forearms from 20 to 40 full years of engineers and technicians to meet the faults at the level of the Republic, and because we believe that safety and the lives of individuals provide services conforming to European standards and factories, we import elevators and equipment directly from the used factory, we are not in competition In the market, we make the market ourselves throughout the period of the customer's needs with experience, money and unparalleled prices. We belong to Schindler School of Elevators. We have a long history within government, hospital and service entities.

### Our Mission

We constantly modernize our services and products in permutant to fulfilling the clients' demands along with introducing distinctive solutions while complying with occupational health and safety.

Our services are available for our clients all over Egypt.

# WHO WE ARE

Since its inception in 1998, Lift Engineering Company continues its long-held legacy that was initiated by its founder, Eng. Ashour Farahat. Eng. Ashour Faraht is an engineering consultant. He obtained an extensive experience in elevators and escalators, working for Schindler Elevator Corporation as an electric power engineer for more than 50 years. His professional experience was fostered, as he was assigned to receive apprenticeships in Swiss, Germany, and Italy about the latest trends in elevator technologies. Further, he is an author of a book entitled "The Electric Elevators", which has been selected to be included as a curriculum book for vocational high schools. He is also a co-founder of KSA-based Ultra Elevator Co., whereby he acts as the Managing Director. Thanks to his professional experience since 1967, he is a member of the permanent Committee for the Egyptian Code of Practice for Lifts, as he is assigned to develop elevator design standards and regulations for hydraulic and electric elevators.
